Iakwe!

Thirty-eight years (38) ago, with the consensus of the Traditional Leaders and their people the Marshall Islands opted to split away from its western neighboring island nations to establish its own independent Sovereign nation.

Back then, the main purpose was: for the people to govern themselves, to live in peace, harmony, and to solidarity stand together as one subscribing to our distinctive traditional values under the principles of democracy.

Today, the House of Iroij stand firm with this principle. Thus, in the spirit of respecting one another, we humbly request that Nitijela revisit and take a further in-depth study of Nitijela Bill No. 6. It is our believe, it is vital for all Marshallese irrespective of whether they're in the Marshall Islands or not to remain within their right to participate in the Electoral processes of the Marshall Islands

Instead of closing the door to vote for our relatives, love ones, and friends outside of the Marshall Islands, we request if Nitijela can seek other viable means of improving the current postal voting system and other related issues.

A hearty thanks to the Nitijela for taking into consideration our request.
